Areas of Academic Interest and Future Goals

My major research project is to explore the seismic properties of the chemical heterogeneities (primarily oceanic ally or continentally originated eclogitic materials) in the deep Earth. Understand the evolution and behaviors of these materials under high P-T conditions can help us to identify them in the Earth's interior, explain seismic observations, and link to the geochemical observations.

Educational background

Prior Institutions and years attended:

Peking University 2013-2017, B.S. in Geology

Current Institution and years attended:

University of New Mexico 2017-2022, Ph.D. in Earth and Planetary Sciences

Employment Experience

Teaching Assistance at Department of Earth and Planetary Sciences, University of New Mexico (2018 spring, 2019 spring, 2020 spring, 2020 fall, and 2022 spring);

Research Assistance at Department of Earth and Planetary Sciences, University of New Mexico (2017 fall, 2018 fall, 2019 fall, 2021 spring, and 2021 fall).

Grants, Awards and Honors

1. Hui-Rong Li Scholarship for the students with excellent performances on study: School of Earth and Space Science, PKU (2014) \$797
2. Physics contest of college students of Beijing: 3rd place, PKU (2014)
3. CNPC Scholarship for the students with excellent performances on study: School of Earth and Space Science, PKU (2015) \$1,276
4. Excellent internship report award: School of Earth and Space Science, PKU (2015)
5. Final list of the Caswell Silver fellowship for entering graduate students: UNM (2017) \$2,000
6. Albuquerque Gem and Mineral Club (AGMC) award (2018) \$1,500
7. Department of Earth and Planetary Sciences Departmental Scholarship (2018) \$700; (2019) \$900; (2021) \$800
8. Vincent C. Kelley Memorial Award (The best Ph.D. award of Department of Earth and Planetary Sciences).
 - Membership of American Geophysical Union (AGU)
 - Membership of Mineralogical Society of America (MSA)

Research

Relevant technical skills

Technical and analytical skills:

- Diamond anvil cell
- Multi-anvil press

- CO₂ laser heating
- X-ray diffraction: single-crystal and powder diffraction
- Brillouin spectroscopy
- Raman spectroscopy
- Fourier-transform infrared spectroscopy
- Nuclear resonant scattering
- Electron microprobe
- Scanning and transmission electron microscopy
- Focused ion beam
- Paris-Edinburgh cell
- Falling sphere viscosity measurements

Computational Skills:

- Programming skills: Matlab; Python
- Software data analysis tools: Eosfit; Crystalmaker; ImageJ; WIN1024; Cij_Works; Gsas; Dioptase; GSE_ADA; RSV

Professional Training:

- Nuclear Resonant Scattering Workshop (2017): CONUSS and Synchrotron Mossbauer Data Analysis
- 22nd National School on Neutron and X-ray Scattering (2020).
- In-Situ Rock Deformation Workshop (2021).
- Advances in Synchrotron-Based Research Towards Understanding the Structure, Evolution, and Dynamics of Earth and Planetary Interiors workshop (2021).
- The Earth Educators' Rendezvous (2022).

Service

- Public Lecture to Albuquerque Gem and Mineral Club (2018).
- AGU SEDI (Study of the Earth's Deep Interior) session mentorship (2021).
- Gem and Mineral Show, Albuquerque, NM (2021).
